## 5011-01, MT.2

### Wire Twister

The Stormtronics 5011-01, MT.2 is a electro-pneumatic table-top wire twister for 12-30 gauge wires.

Designed to not damage the wire insulation, the MT.2 uses regulated air pressure to compress the adapter tubing onto the wire for a firm yet delicate hold. The MT.2 is a very simple to use machine with a 2-stage footswitch to control the 4-digit Twist counter and 2500rpm variable speed motor with reversing ability. The MT.2 will keep count of your assemblies with a 4-digit re-settable Batch counter.

Simple Operation, just enter the number of twists desired on the twist counter, insert the wires in to the mandrel adapter collet, press the footswitch first stage to clamp the wire in the mandrel, pull loose end of the wire away from the machine, compress the second stage of the footswitch and the machine will twist the wire with the set number of twists. Release the footswitch, remove the wire from the mandrel insert more and repeat.

5011-01 MT.2 shown with standard kit

- Pneumatic clamp does not damage wire insulations
- 4-Digit presettable twist counter
- Variable speed motor with reverse
- Wire clamp pressure regulator with gauge
- Assembly batch counter
- Foot-switch activated
- Repeatable consistent accuracy

#### Accessories available:

- 4600-01 Remote Clamp assembly
- Terminal cup for pre-terminated wire
- 2" and 4" mandrel extensions
- Spare parts kit

#### Optional Footswitches:

- 4001-00, two pedals on single base
- 4002-00, two pedals with 10' separation
- 3916-00, footswitch safety guard
